Title Optimal Stochastic Interventions with High-dimensional Data

Version 0.0

Authors Connor Jerzak <connor.jerzak@austin.utexas.edu> [aut, cre]', 'Kosuke Imai <imai@harvard.edu> [aut]

Description Software for performing optimal stochastic intervention analysis with high-dimensional data.

Depends R (>= 3.3.3)

License Creative Commons Attribution-Noncommercial-No Derivative Works 4.0, for academic use only.

Encoding UTF-8

LazyData true

Maintainer 'Connor Jerzak' <connor.jerzak@gmail.com>

RoxygenNote 7.2.1

R topics documented:

cv.OptiConjoint	1
OneStep.OptiConjoint	2
OptiConjoint	3

Index	4
--------------	----------

cv.OptiConjoint	<i>Implements...</i>
-----------------	----------------------

Description

Implements...

Usage

cv.OptiConjoint(...)

Arguments

x	Description
---	-------------

Details

cv.OptiConjoint implements...

Value

z Description

Examples

```
# Perform analysis
cv.OptiConjoint <- OptiConjoint()

print( cv.OptiConjoint )
```

OneStep.OptiConjoint	<i>Implements...</i>
----------------------	----------------------

Description

Implements...

Usage

```
OneStep.OptiConjoint(...)
```

Arguments

x	Description
---	-------------

Details

OneStep.OptiConjoint Description

- Description

Value

z Description

Examples

```
# Analysis
OptiConjoint_analysis <- OneStep.OptiConjoint()

print( OptiConjoint_analysis )
```

OptiConjoint	<i>Implements...</i>
--------------	----------------------

Description

Implements...

Usage

OptiConjoint(...)

Arguments

x	Description
---	-------------

Details

OptiConjoint implements...

Value

z Description

Examples

```
# Perform analysis
OptiConjoint_analysis <- OptiConjoint()

print( OptiConjoint_analysis )
```
